

NNPDF-Funded Research Grant # 44

TITLE: Additional contribution to LSD Research Consortium for research into issues of common interest to all LSD support groups

(See also Grant # 40)

PROJECT INVESTIGATOR: Multiple

PERIOD: 4/1/2006 - 3/31/2007

PROJECT DESCRIPTION

Funding research into issues critical to all (or to large groups of) Lysosomal Storage Diseases rather than having each group separately raise funds to investigate these problems. NIH is assisting the LSDRC to find suitable projects and, in some cases, funding projects of its own in this area.

Final STATUS REPORT

Dated 3/31/2007

The NIH again called for proposals that target novel ways of conquering the blood-brain barrier in Lysosomal Storage disorders. Three further research projects were funded by the LSDRC in 2007

Dr. Eain Cornford, Brentwood Biomedical Research Institute "Trojan Horse Gene Therapy of Inclusion Body Disease"

Dr. Xiaoyang Qi, Children's Hospital Medical Center "The Physiological Importance of Saposin C's Fusogenicity"

Dr. Matthew Ellinwood, Iowa State University "Pathogenesis of murine MPS IIIB"
