

Niemann-Pick Disease Awareness Month

Ultra Rare
need **People**
Extraordinary
support

NNPDF.ORG

Niemann-Pick Disease affects less than 1000 people worldwide. It causes **enlarged liver and spleen, cognitive delay, regression, seizures, dementia, respiratory infections** and more. It robs patients of mobility and even their life,
BUT IT WILL NOT STEAL OUR DETERMINATION FOR A CURE.

Will you help?

For 25 years, NNPDF has supported these families. Your gift of just \$25 today will help us continue to be there for them.

National Niemann-Pick Disease Foundation
