Seeking Individuals or Parents of Individuals Diagnosed with

ASMD

Acid sphingomyelinase deficiency
(also known as Niemann-Pick disease)

RTI Health Solutions (RTI-HS), a non-profit research organization located in Research Triangle Park, North Carolina, is recruiting certain types of patients with ASMD, type A/B or type B (also known as Niemann-Pick disease, type A/B or type B). If you are 18 years of age or older and have been told by a doctor that you have ASMD or you are the parent of a child of any age who has been diagnosed with ASMD, you may qualify.

You will be asked questions about your experiences with ASMD and opinions about hypothetical treatments for ASMD. The survey will take 20-25 minutes to complete and you will receive \$50 as compensation, if you are eligible and complete the survey.

*To learn more about this survey or to find out if you are eligible,
please contact Andrew Fox at RTI Health Solutions.*
