

Mouse Model Grant to Jackson Laboratory

The NNPDF is pleased to be able to provide \$2500 to help defray the costs of processing the mouse model related to Niemann-Pick Disease. The mouse model was created by Dr. Richard Pagano of the Mayo Clinic College of Medicine and is being processed by the Jackson Laboratory Repository.

The nonprofit Jackson Laboratory Repository in Bar Harbor, Maine, serves as a centralized NIH-funded facility for mouse models used by the international biomedical research community, in both academic and nonprofit institutions.
