

Support research on early **NPC** intervention

AllStripes and NPC foundations are creating an NPC research program. The first study will support efforts to include NPC among conditions recommended for newborn screening.

For this study, we're looking for families of **40 sibling pairs with NPC** to join AllStripes. To participate in future research opportunities like this one, **all families affected by NPC** can join AllStripes.

How you can help

Join other NPC patients and families on AllStripes to contribute to multiple research efforts.

1. Go to allstripes.com/npc

2. Create your account

Sign up, review our research consent and share the names of your health facilities (about 10-15 minutes). No appointments, no uploads.

3. Success — you're a hero for NPC

We collect and de-identify your medical records to power research. You'll receive research updates and all your records in a private, secure account, **at no cost**.

What is AllStripes?

As the leading research platform dedicated to rare diseases, AllStripes makes it easy for patients to contribute to new treatment studies from home.

We do the work to collect and analyze your de-identified medical records to help power faster, better drug development for your condition.
